Dunnage Airbags

Cost effective load securement systems

When your products get damaged during transport the results will be higher delivery costs, time-consuming insurance claims, and, more importantly, frustrated or even lost customers. Shippers Dunnage Airbags are the most efficient bracing and cushioning products available to protect goods from motion damage during transportation. Airbags are placed in the open spaces between the cargo and then inflated with compressed air. The inflated airbags put constant pressure on the load to keep it in place during the entire journey, preventing cargo from shifting both side to side and in the lengthwise direction. Shippers Dunnage Airbags offer you an cost effective and efficient load securement system. The self-closing valve closes automatically as soon as the inflator is removed from the valve.

Delivery programme		Technical data		Packaging unit	
Ref. Nr.	Dimension (cm)	Duty	Working pressure (bar)	Maximum void (cm)	Number per pallet (pcs)
O020611	60 x 110 MD	Medium	0,20 bar = 20kPa	30	300
O020911 AFF	85 x 110 MD	Medium	0,20 bar = 20kPa	36	250
O020813	85 x 130 MD	Medium	0,20 bar = 20kPa	36	225
O020918 AFF	85 x 180 MD	Medium	0,20 bar = 20kPa	36	200
O020818	85 x 180 MD	Medium	0,20 bar = 20kPa	36	150
O021011	100 x 110 MD	Medium	0,20 bar = 20kPa	45	225
O021015	100 x 150 MD	Medium	0,20 bar = 20kPa	45	200
O021018	100 x 180 MD	Medium	0,20 bar = 20kPa	45	175
O021021	100 x 210 MD	Medium	0,20 bar = 20kPa	45	125
O021218	120 x 180 MD	Medium	0,20 bar = 20kPa	49	160
O021221	120 x 210 MD	Medium	0,20 bar = 20kPa	49	160
O031013	100 x 130 HD	Heavy	0,30 bar = 30kPa	45	175
O031018	100 x 180 HD	Heavy	0,30 bar = 30kPa	45	125
